

1. Freeze Three disjoint item families (diagnostic / practice / held-out)

2. Serve Server-side scoring; fail-closed before response

3. Select EIG adaptive selection; four-state belief; prerequisite descent

4. Teach Checkpoint anchored to verified standard solutions

5. Recommend Signed video-resource trails (track map); propensity snapshots

6. Verify Held-out check on two unseen families; FSRS stability

*All six stages read the same evidence ledger; no stage can invent a fact.*
